

3i Consulting Launches First Mobile Employee Self Service Portal for SAP ERP® Human Capital Management on BlackBerry

San Francisco, CA and New York, NY, May 11, 2009 - 3i Consulting, leading developer of complimentary mobile solutions for the SAP® platform, announced today the availability of the world's first Employee Self Service (ESS) portal specifically designed for the SAP® ERP and BlackBerry® platform. The solution, powered by 3i's Mobile Workplace platform, provides fast, simple access to common ESS functionality such as SAP Workflow tasks, creation and updating of employee banking, address and benefits information as well as time sheet entry and creation of leave requests. The functionality available on Employee Self Service portal is highly configurable and the portal can also be enhanced with any federal, country and state specific functionality.

"2009 is shaping up to be an exciting year for SAP mobility as there is an increasing focus on cost reduction and the ability to streamline non income-producing activities, such as HR functionality, is pushed further into the spotlight," said David Sherman, Director of Sales at 3i Consulting Inc. "When a company considers how much time is wasted by employees chasing approvals or leave requests they quickly see the inherent value in mobilizing these SAP processes."

BlackBerry® and related trademarks, names and logos are the property of Research In Motion Limited and are registered and/or used in the U.S. and countries around the world. Used under license from Research In Motion Limited. SAP® ERP is the trademark(s) or registered trademark(s) of SAP AG in Germany and in several other countries.

About 3i Consulting

3i Consulting has been developing complementary SAP products since 2001. 3i focuses on increasing productivity of end users by delivering solutions that address 'bottle necks' in business processes. 3i offers a QuickStart trial of Mobile Workplace through its website, www.3i-consulting.com.
